802.3ch screening attenuation fix

Thomas Müller

13th March 2019

Issue description

- Clause 149.7.1.5 defines requirements on the shielding of the link segment, using the term shielding attenuation.
- According to IEC standard series IEC 62153-4-x on triaxial test methods, the correct term is screening attenuation, not shielding attenuation as currently used.
- In most of the contribution, the correct naming was used, but unfortunately not in the motion (see motions_3ch_01a_1118.pdf).

Proposed change

- Replace shielding attenuation by screening attenuation within the standard
