COM 2.95 Update for draft 1.3

Richard Mellitz, Samtec

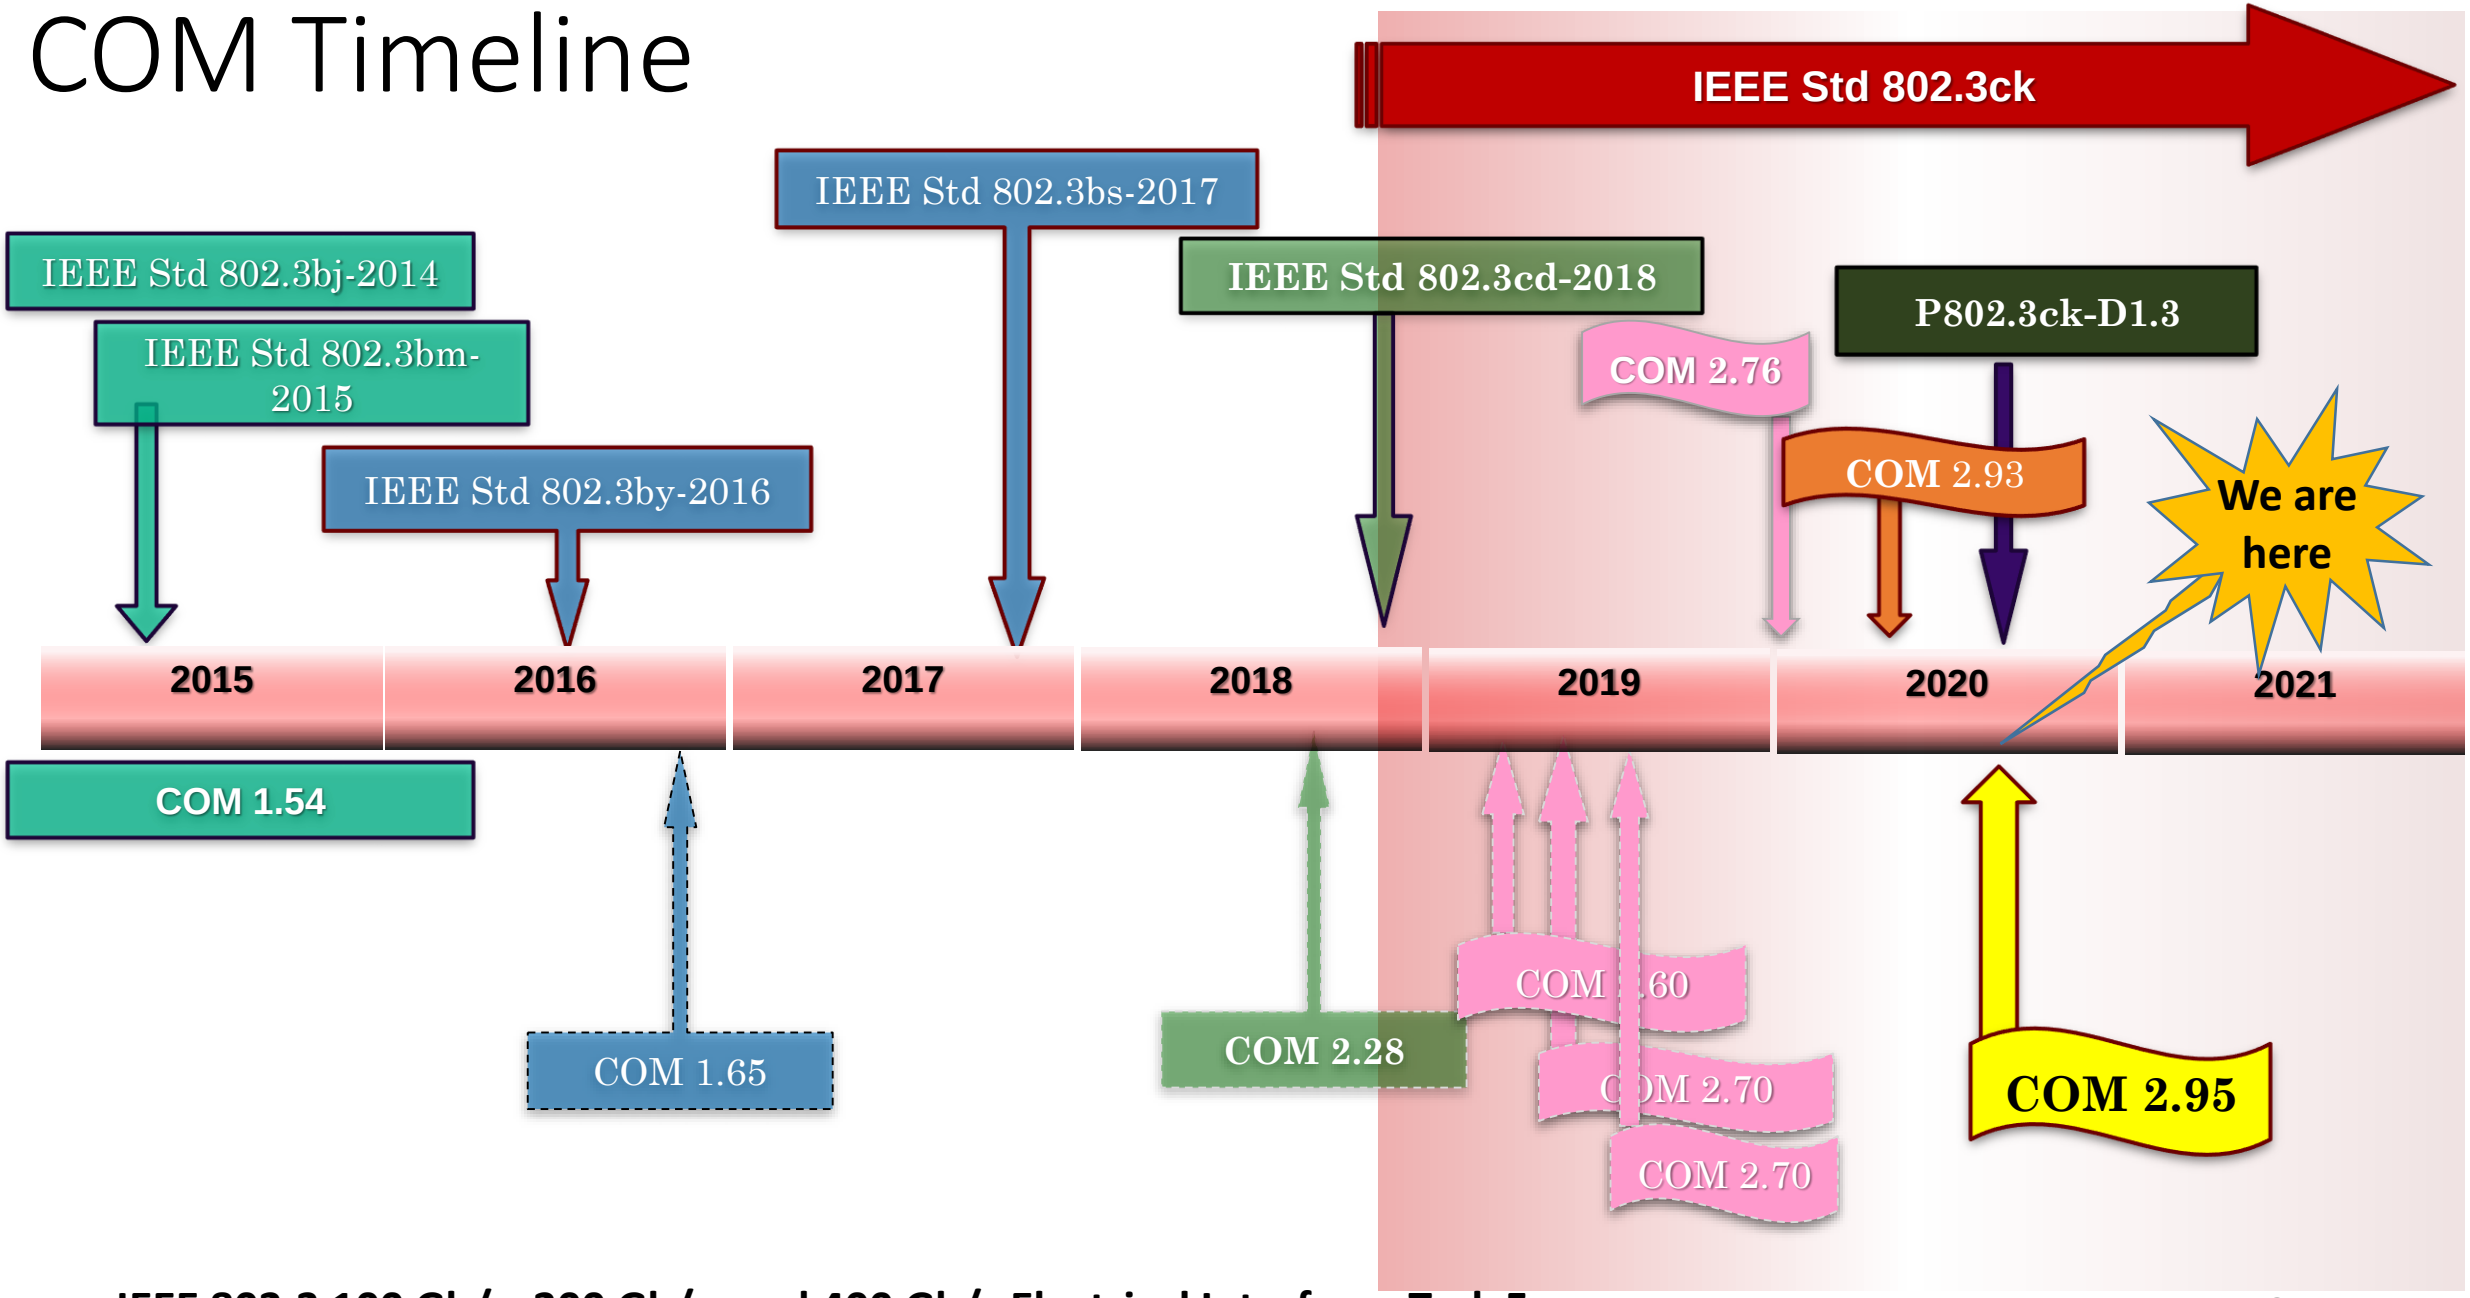
September 09, 2020

IEEE 802.3 100 Gb/s, 200 Gb/s, and 400 Gb/s Electrical Interfaces Task Force Ad Hoc

Table of Contents

- ❑ COM Timeline
- ❑ COM 2.95 Highlights
- ❑ New Keywords
- ❑ Summary
- ❑ Backup / configuration sheet examples

COM Timeline



COM 2.95 highlights

- Add g_{DC} and g_{GDC2} range limitations for 120G (table 120G-10)
- Add Tukey Window for .3ck definition for ERL and TDR computations (eq. 93a-58, 58a, 58b)
- Fix ERL problem when s2p files are used
- Add parameter Noise_Crest_Factor keyword for investigation
- Add VEC Pass threshold to align with 120G
- Removed close force all command in code. Tagged all figures with "COM"
- Consolidated printing in code with in new function "end_display_control“
  - Better Reporting for PMD_type keyword usage which can be C2C or C2M
- Report pre/pmax for Txffe
- Speed up multiple test case computation by not re-reading in s4p files
- Added config file type xlsx and mat.
- Added keyword to save config spread sheet as a mat file
- Added tab listing keywords in xlsx files

New Keywords “G_Qual” and “G2_Qual”

G_Qual	[-2 -9 ;-2 -12; -4 -12;-6 -13]	dB	ranges
G2_Qual	[0 -1 -2 -3]	dB	ranges

- G_Qual are the dB ranges of g_DC (g_{DC})which correspond to g_DC_HP (g_{DC2})
- G2_Qual limit values of g_DC_HP (g_{DC2}) which corresponds to ranges of g_DC g_{DC} specified with G_QUAL
- Reference to table 120G-10

New Keyword “Tukey_Window “

- If set to 0 or not specified then no action for computing TDR is taken
- If set to 1 then equations (eq. 93a-58, 58a, 58b) are used for TDR and ERL computations

Keyword ‘TDR_W_TXPKG”

- This is used for ERL computation
- One single package (specified in the config sheet) is cascaded to the passed test channel at TP0.
- This means that if a channel TP0 to TP1a are passed to COM, ERL with the specified channel and a reference package is reported at port 2 (Rx).

Keywords
PMD_type, BREAD_CRUMBS, SAVE_CONFIG2MAT

- "PMD_type" is either "C2C "(default if not specified) or " C2M"
  - This changes reporting for COM to EH and VEC
  - Not really actual standard PMD mnemonics
- "BREAD_CRUMBS", 0 (default) or 1
  - Save internal structure to COM output structure.
- "SAVE_CONFIG2MAT" 0 (default) or 1
  - Save the config file to a mat file.
  - Same file name with a .mat extension
  - Support new syntax
    - com_ieee8023_93a_295('config_com_ieee8023_93a=3ck_d1p3_KR_09_01_2020.mat',...
    - com_ieee8023_93a_295('config_com_ieee8023_93a=3ck_d1p3_KR_09_01_2020.xlsx',...

Summary

- ❑ COM 2.95 offers better agreement with d1.3
- ❑ COM 2.95 offers EH and VEC estimate reporting for 120G

Thank You!

KR 163 d1.3 example
