

# Super-PON PMD (normative)

IEEE P802.3cs, June 17, 2020  
Liang Du (Google)

# Overview

- Revised CD calculations based on the 16-channel plan presented to the IEEE. Previous version used a 20-channel plan.
- Exact changes to PMD tables

# Chromatic dispersion calculations

# Linear interpolation of CD values (Vince - Corning)

Reference CD values from Corning [ps/nm/km]			
Wavelength [nm]	Min values	midpoint	Max values
1550	16.7	17.05	17.4
1625	21.2	21.6	21.8

CD for key Super-PON wavelengths (using full 16 channels) [ps/nm/km]			
Wavelength [nm]	Min values	midpoint	Max values
1597.93	19.58	19.96	20.21
1585.54	18.83	19.21	19.49
1561.42	17.39	17.74	18.07
1549.32	16.66	17.01	17.36

# Residual CD tolerances

Residual dispersion [ps/nm]				
Distance [km]	C-band min	C-band max	L-band min	L-band max
0	0	0	0	0
25	416.5	451.7	470.8	505.3
30	499.8	542.1	565.0	606.4
50	833.0	903.5	941.6	1010.6

Update DS residual CD tolerance to 910 ps/nm.  
Round up slightly to make sure we have coverage.

# DCM values

- Using the residual CD values from slide 5, the following table was calculated
- These values assume no slope matching

Propose -590 ps/nm for 0 - 30 km DCM.  
Closer to the zero res CD point for 30 km.  
0 km expected to have much more margin.

Acceptable DCM values for US assuming -600 to 50 residual CD [ps/nm]				
Distance [km]	Min	Max	midpoint	Range (min-max)
0-30	-556.4	-600	-578.2	43.6
25-50	-960.6	-1070.8	-1015.7	110.2

max dist \* max CD -50

min dist \* min CD -600

Propose -1020 ps/nm for 25 - 50 km DCM  
Slight bias for longer links where margins will be smaller.  
Keeps 50 km in negative net CD region.

# Resulting min/max residual CD values

Residual CD values			
Distance [km]	DCM value	Min	Max
0-30	-590	-590	16.4
25-50	-1020	-549.2	-9.4

- Proposed DCM values keep residual CD within the proposed bounds
- Allows >5 km overlap between the long and short links. This is important for OSP planning

# Normative PMD table updates

# Instructions for editor to update draft

- OLT transmit PMD table:  
Update table 200-5 with highlighted fields of the table on slide 10
- OLT receive PMD table:  
Update table 200-6 with highlighted fields of the table on slide 11
- ONU transmit PMD table:  
Update table 200-7 with highlighted fields of the table on slide 12
- ONU receive PMD table (200-8): no changes
